

Quality Policy

Statement of Company Quality Quest.

Recognising both moral corporate duty and Commercial imperative, Paramount Platforms dedicates itself to the pursuit of improvement in every sphere of its endeavour.

The Market and the Corporate community demand the highest standard of quality conducive with economic and competitive product and service supply.

Every member of our company will be urged and encouraged to, and induced to, promote quality enhancement and development in every facet of our operation.

Having cultivated the quality quotient, best corresponding perfection with commercial practicality, to keep measure of that balance and to maintain that standard of compliance.

Specifically, we will apply ourselves to this level of perfection in the following areas :

Equipment

Specification, procurement and sourcing of equipment. Its careful maintenance and cleanliness.

Our People

Selection, Training, motivation, development presentation and commitment.

The promotion and cultivation of the highest attitudes of honesty, manners, endeavour, industry and community responsibility. Personal presentation reflecting our clean professional approach to our mission.

Commercial Durability.

To apply and maintain sufficient financial resources to properly service our operation and growth and reimbursement of our suppliers to meet their reasonable terms and maintain a strong supplier bond.

Suppliers and Sub-Contractors

Select, monitor, develop, nurture and maintain our supplier base.

Assess and record ongoing performance to ensure maintenance of Paramount's quality aspirations.

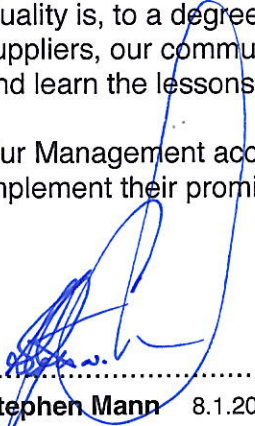

Deselection of unworthy suppliers will be a necessary part of maintaining the highest standards.

Legislation and Regulation.

Those rules and guidelines which contribute to the containment of the dangers and hazards inherent in the nature of our industry, are recognised and respected. We undertake to know them and, keeping abreast of changes, to follow, comply, and timely produce certification, evidencing such compliance.

Quality is, to a degree, subjective. To gauge our success, we mustn't assume. Our customers, our suppliers, our community, will judge. We must listen carefully with attention, respect and humility and learn the lessons these messages will impart.

Our Management accepts and endorses the principles outlined above and will actively strive to implement their promise, daily.
